The publishers of THE BEE have made arrangements with the American News Company to supply News Dealers in Illinois, Iowa, Nebraska, Wyoming and Utah.

SENATOR VAN WYCK has left Washington for a short visit to his constituents.

ATTENTION is called to the filthy alleys which disgrace many parts of the city.

In promptly confirming Mr. Howe as city attorney, the city council secured an honest man and an able lawyer.

There is one industry that is not likely to need protection in this country for some time to come and that is the industry of speech making.

CHICAGO assessments have been raised twenty per cent. Property in Omaha has advanced nearly forty per cent in value during the past year.

A SESSION of the Nebraska legislature without a fight in the Douglas county delegation would be like the play of Hamlet with Hamlet left out.

One hundred and twenty-five thousand Canadians emigrated last year to the United States. Canada seems to be a good country to get away from.

FROM the very general tone of the Blaine press the conviction forces itself upon the public that the "plumed knight" is about to reappear in public life.

Good municipal government can only be secured by individual responsibility of every office holder, and a rigid accountability to the general public.

A WASHINGTON dispatch says that "the ships of the future will probably be built of steel." The ships of the present have been almost entirely constructed of "steel."

The United States has 45,700 post-offices, and the number is increasing at the rate of one thousand a year. Hence the political importance of the patriots who are postmasters.

SINCE the Jennette and Rogers episodes, the impression is gaining ground that congress has something better to do than to encourage expeditions by lending aid to Arctic expeditions.

LOUISIANIANS rejoice once more in the possession of their old capital. For the first time since Ben Butler's day the legislature is in session in Baton Rouge, the old capital having been rebuilt.

DON CAMERON has vaulted into the Pennsylvania ring with a cheerful smile, and the old familiar Cameronian "hoop la." But the Philadelphia independents declare that the circus has hardly began.

REDIRECTING at the late extra session cost Missouri \$26,000. It took two weeks for the construction of a political map of Missouri, which looks like the blackboard of a country schoolhouse after the recess.

THE Arizona outbreak is about over. General John Pope has been too busy planning his campaign after a brigadier generalship, which he will never get, to pay much attention to the operations of his subordinates in the field.

THE president will soon send a message to congress, asking an appropriation of \$60,000 for deficiency in the census appropriation. This is necessary to continue the reduced force for the remainder of the fiscal year. Strong hopes are entertained that the census of 1890 will be nearly concluded before the time arrives for the enumeration of 1890.

EVERY once in awhile a democratic editor turns up who has not had all his common sense soaked out by Bourbonism and bourbon. Stillson Hutchinson, in a recent letter from Washington to a New Hampshire paper, remarks: "I find there is only linen enough to wash in my own party without setting up a laundry for my neighbors." Mr. Hutchinson is too candid for his clothes.

EQUITY AND THE RAILROADS

It has come to us that Blair and Fremont receive better rates and treatment than Omaha at the hands of the Iowa pool, because they are not "pooling points" and Omaha is.

When commercial equity and equity are ruling principles in railroad management the monopolies will have no further use for subsidized newspapers of the Republican stamp.

The discrimination which the organ of the Union Pacific charges has been practiced by the Iowa part against Omaha is a feature of the policy of the Union Pacific itself throughout its entire system.

No candid person who has studied the history of railroading in the United States believes that railroads are governed by legitimate business principles.

The greatest stimulus to mercantile business is competition. It is at the same time the chief protection to the people who deal with our merchants.

There is a general impression among Omaha merchants and taxpayers that true economy in paving in this city requires that none but durable material shall be used for paving purposes.

The railroad empire in this country has been built up and cemented by an entire disregard of the principles which operate and maintain in commercial transactions.
